

Perfect Woman Breast Enlargement Cream Review

Last Updated Wednesday, 10 March 2010

We'd like to present to you Perfect Woman Breast Enhancement cream. Read our review to learn about advantages and disadvantages of this natural product. Read more...

"Larger, Firmer and Shapelier Breasts in Just 4 weeks?" Perfect Woman is a breast enlargement cream that claims to naturally increase your breast size in a couple of weeks. On the official website it says that on average, "noticeable increases usually begin happening in as little as 4 weeks" and that "in most cases, individuals will realize increases of 1/2 to 2 full cup sizes in just three months." Okay, but how real is that? To find this out we have to carefully look at the main ingredients of this breast enhancement cream. Producers of this natural cream explain that breast expansion effect is possible so fast, because Perfect Woman cream contains wild yam as a main ingredient. What is so special about Wild Yam? Wild Yam was used by Aztecs and Mayas as a medicinal herb to treat female health problems and relieve the pain of childbirth. Research has shown that wild yam contains phytoestrogens, such as Diosgenin, which is very similar to human progesterone and which our body can recognize. For that reason this herb is believed to be very beneficial for endocrine system – it regulates female hormonal balance and eases PMS and menopause symptoms. The adverse effect of the wild yam is that when taken internally it can sometimes cause upset stomach, but when applied topically there is no risk of such side-effects.

"Before using Perfect Woman, my bust size was a 34B... BARELY. And now, after using Perfect Woman, it's definitely a FULL 34B. I would say, 'I'm about ready to buy new bras!' Ryan Reid "I would most definitely recommend the Perfect Woman system to other women. In fact, I can't think of a single reason why not to! There's no risk, it's an all-natural product, and what it does for you in regards to both your body and your sense of self-esteem is priceless." Heather Hancock

"I look better, I feel better. And I can wear really cute tops now without sagging. My breasts are perky now. I feel so much more confident now that I've used Perfect Woman. It's made a big difference in my self-esteem!" Rocki Porter

When you begin applying Perfect Woman breast cream once a day, as recommended, these elements start to accumulate in your breast tissues, making your fat cells there bigger. The number of your fat cells itself does not change and this is the reason why the results of breast enlarging cream are limited to 1 or 2 cups increase only. But as you use the cream topically on your chest area, you will not gain weight in other parts of the body – only the fat cells of breast tissues will be affected. Perfect Woman Breast Enlargement Cream has worked for many women, who were glad to share their opinions in the videos on the official website of the product. But the question is – will it work for you? Not all women are responsive to wild yam, but this breast enhancement cream has extracts of other natural herbs to increase its chances to be effective for you. These other natural ingredients include:

Saw Palmetto Extract

Dong Quai Extract

Dandelion Extract

Blessed Thistle Extract

Kava Kava Extract

Mother's Wart Extract

Fenugreek Extract

Black Cohosh Extract

Fennel Extract

Cumin Extract All these herbs are known to have estrogenic effects and many of them are used in other popular breast enlargement products. The combination of these herbs together with wild yam makes Perfect Woman breast cream an excellent choice for: Women who want to increase breast size by 1 or 2 cups Women who want to have firmer and shapelier breasts Women who want to return their breast size and shape after childbirth and breastfeeding

One small, but very important detail – Perfect Woman does NOT contain L-Tyrosine. L-Tyrosine is an amino acid added to many breast enhancing products. It can interfere with MAO inhibitors and many other drugs that are usually prescribed for blood pressure control, depression and cancer treatments. The company took care to produce a cream that would be suitable and risk-free for people who take these medicines. !!! WARNING !!! This product is NOT suitable for pregnant and breastfeeding women. And even though manufacturers assure that there are no side-effects, remember that herbs can cause allergies. Therefore, always test natural creams on a small area, to see if you have a reaction.

One jar of Perfect Woman lasts for about a month. As you use it, you may experience tenderness and slight discomfort in the breast area. These symptoms are similar to signs of breast development that many women experienced during

puberty. It usually indicates that the cream is working and your breasts tissue began to expand. These symptoms are not permanent. You will only experience them in the first few weeks, and then the discomfort will fade away. Perfect Woman is a product of great value. The benefits it offers compared to plastic surgery are not even discussed here. Cheaper, painless, safer – you already know the advantages if you are looking for ways of natural breast enlargement. But compared to other breast enhancing products on the market, Perfect Woman offers quite a few impressive benefits.

By investing \$69.95 you will receive: - A natural breast enlargement cream, made of powerful herbs that were successfully used for centuries
